GROUP 1
South Africa

• GHG
  • Commissioned the study for all the sectors (main-energy) to fill the gaps from 1990-2000

• NDC
  • High level measurement (policies that have the most impact). Identifying the indicators to track progress for those sectoral policies and measures

• Challenges
  • Internal challenges
  • Inconsistent Time series (data gaps)
  • NC/BUR Compilation - GEF application process, lengthy procurement process (NATCOM), lengthy stakeholder consultations

• Training Needs
  • Training of IPCC guidelines for the AFOLU Sector
Malawi

• GHG
  • GHG Inventory in the process of peer-review by Zimbabwe
  • Inventory Compilation done in house

• NDC
  • Strengthening the sectors to provide the data through the sensitization workshops
  • Improvement of the M&E framework

• Challenges
  • Limited capacity on the ipcc guidelines
  • Format of data from institutions not compatible
  • **NC/BUR Compilation** – Lack of political will, transitioning from the use of consultants to national experts form government ministries, data collection on adhoc basis

• Training Needs
  • Training on the IPCC Software and guidelines
  • Data collectors (all sector) and National Statistics Office for NDC indicators
Lesotho

- GHG Inventory
  - Currently GHG Inventory reviewed by South Africa
  - Inventory compilation done in-house

- NDC
  - Review of the NDC
  - Development of the Implementation Plan
  - Stakeholders engagement plan including capacity building of sectors to understand their role

- Challenges
  - Limited capacity on the IPCC guidelines
  - Unavailability of the land-use data, forestry, energy
  - **NC/BUR Compilation** – Frequent change of government, transitioning from the use of consultants to national experts form government ministries, Insufficient pool of national experts, data collection on adhoc basis, lengthy procurement process, dedicated staff to work on NC/BUR

- Recommendations
  - UNFCCC – GIR CASTT Training Programme with Government of Korea
  - UNFCCC GHG Online review trainings
  - Trainings by consultative group of experts at regional level

- Training Needs
  - IPCC 2006 Guidelines, based in Ministries, for people inputting data in the software
  - Short courses on IPCC Guidelines with certification
Mozambique

• GHG
  • Currently collecting data for sectors for the compilation of the GHG inventory

• NDC
  • Draft under review, soon be published

• Challenges
  • Coordination mechanisms
  • heavily depend on consultants
  • **NC/BUR Compilation** – Lack of political will, Not enough personnel to compile the reports in the department, data collection

• Training Needs
  • Forest and land use sector training on how to collect data on burning areas
  • Use of IPCC guidelines and software
Madagascar

• GHG
  • Only used IPCC 1996 Guidelines for 2005 to 2010 inventory

• NDC
  • Legal mandate of responsible ministry to coordinate implementation of NDC

• Challenges
  • Limited capacity on the IPCC 2006 guidelines
  • No coordination among ministries
  • NC/BUR Compilation – High staff turnover, lack of skills transfer, frequent change of government (decision makers not involved in the process)

• Recommendations
  • Improve institutional arrangements (Training of decision makers on NC/BUR Process)

• Training Needs
  • IPCC 2006 Guidelines
