BOTSWANA

SOUTHERN AFRICAN REGIONAL MRV NETWORK 1ST TRAINING AND PEER REVIEW WORKSHOP

ESWATINI

3-6 SEPTEMBER 2019
STATUS OF THE MRV FRAMEWORK

- The MRV framework for Botswana is still in its early stages. Implementation is a challenge.
- UNDP/UNICEF projects for data collection, processing and analysis.
- MENT/UNDP/UNICEF - To create one system.
INSUFFICIENT CAPACITY AND RESOURCES

• Lack of or limited human capacity and/or know-how, limited
• Lack of financial and other resources
INSTITUTIONAL ARRANGEMENT;

- Lack of effective institutional arrangement
- Limited technical and financial resources
- Limited availability of qualified human resources to carry out vulnerability assessment using different available models;
CONSTRAINTS

• Data Organisation - Data scattered in many agencies

• Non-availability of relevant data - AFOLU is a key source of greenhouse gases. There is a lack of data such as harvested wood, manure management, and the amount of fertiliser used.

• Access to data - Lack of institutional arrangements for data sharing
BUR GUIDELINES

• The BUR guidelines are open to interpretation.
• More useful guidance needs to be provided so that the technical people can draft the reports and fill out the reporting tables.
STATUS OF BUR/NC

- Report complete
- undertaking stakeholder consultations
